Therapeutic Implications _____

Option 2 Updates on Occupational Therapy in Acute Care _____

Classes will be filled based on receipt of registration.

If no choice is selected, we will place you.

MORNING SESSION

Option 1:

Building a Treatment Plan for Feeding Success: Tools for your toolbox

Carol Elliott, B.S., OTR/L

Pediatric Feeding treatment covers a vast array of feeding problems and can be overwhelming and confusing for many pediatric therapists. This presentation is designed to give pediatric occupational therapists new tools in their toolboxes using the TR-eat® Model (Transdisciplinary Effective Assessment and Treatment). It will cover the groundwork, how to lay a good foundation and then building skills for success.

Option 2:

Post-Stroke Strategies / UE Spasticity

Steve Page, OTR/L, PhD, MS, MOT, FAHA, FACRM, FAOTA

1. Bigger, Faster, Stronger: Easy to apply, efficacious, post-stroke strategies for the affected UE
2. Getting a grip on upper extremity spasticity

AFTERNOON SESSION

Option 1:

Neonatal Abstinence Syndrome: Developmental Effects and Therapeutic Implications

Shanna Carter, B.S., OTR/L

This course will cover defining NAS, how it is diagnosed, the effects of various drugs on the developing fetus and the ongoing developmental effects on infants and children as well as therapeutic interventions.

Option 2:

Acute Care

Samantha Bates, MOTR/L and Melissa Covert, MOTR/L

This course will include clinical indications to medically and therapeutically manage the acute care patient. Occupational therapy assessments and treatment interventions will be identified and discussed for the critical, chronic, and post-surgical acute care patient.
